Education

Florida State University

May 2023

Bachelor of Science in Computer Science

Tallahassee, FL

- **Relevant Coursework:** Data Structures & Algorithms (COP 4530), Discrete Math II (MAD 3105), Probability (STA 4442), Algorithm Analysis (COP 4531)

Experience

LLM Validation — AI Training Data Annotation

Mar 2025 – Present

LLM Validation

Remote

- Gathered, cleaned, and curated specialized datasets for AI training and business intelligence use cases.
- Developed adversarial prompts to test AI model failures including constraint violations and context loss.
- Prompt-engineered and refined React SPAs generated by LLMs for high-quality production output.
- Evaluated LLM responses using technical prompts, Created fine-grained unit test and scoring criteria, and scored responses based on relevance, accuracy, and quality.

ClearChoice Health Care

Jul 2024 – Feb 2025

Conversion Analyst — U65 Health

Pompano Beach, Florida

- Managed ad spend across lead providers to reduce CPS and increase revenue.
- Analyzed inbound call data to improve conversion efficiency across teams.
- Mentored sales reps and closed high-value deals to ensure conversions.
- Developed models and automation for data extraction, cleaning, and reporting.

Alexa Media Marketing

Jun 2023 – May 2024

Digital Marketing Specialist

Deerfield Beach, Florida

- Developed internal WordPress automation tools that produced SEO-optimized “areas served” pages from CSV input, allowing for increased search visibility and exponentially quicker content creation and deployment.
- Designed and developed client-facing business websites.
- Developed and oversaw Google Ads and Facebook Ads campaigns, creating specialized marketing plans to achieve company and client objectives.

Projects

Golang Product Monitor | *Golang, CLI, HTTP Requests, JSON Parsing*

- Built a CLI-based tool to monitor product availability for Pop Mart releases, allowing users to track stock status in real time.
- Designed for future integration with automated checkout features to streamline user purchases.

Chef-Maria | *JavaScript, React.js, Node.js, MongoDB, Tailwind CSS*

- Redesigned and developed a performant private chef web application with an SEO-optimized, multi-page layout and responsive design.
- Implemented a booking system with real-time calendar updates based on approved requests and chef availability.
- Built an admin dashboard for managing inquiries, availability, and request approvals.
